

Tutoring is a Promoter of Spirituality

Norova Malika Saidovna

Tutor of Shakhrisabz State Pedagogical Institute

legenda77707777@gmail.com

Abstract: The article analyzes the issues of effective organization of tutoring activities in higher educational institutions, organization of students' free time in a new spirit, motivational, organizational and practical work.

Keywords: tutorship, educational institution, innovative pedagogical activity, students and youth, spiritual and educational education, propaganda.

The formation of a healthy generation is one of the most important and urgent problems of our modernity. Because of the most complex priorities of the reforms carried out in our society is of great importance.

After gaining independence, much attention is paid to the formation of a healthy and mature generation. Therefore, it is necessary to pay great attention to the role of the social environment, family, neighbourhood, educational institutions in a society in which a healthy generation is being formed.

We among the people have a saying that if a person has pure ancestors and a pedigree, then his children will be the same. According to President Sh. Mirziyoyev, "We owe our whole life to such blessed people who gave all their energy, knowledge and potential to the development of our country and the well-being of our people. We will create additional opportunities to make the life of our respected elders more pleasant, so that they are more actively involved in our public life, especially in educating the youth of New Uzbekistan, with their rich experience and useful advice" [1].

The education of youth is a continuous and regularly organized social process so that it does not fall under the influence of alien worldviews and destructive ideas, religious extremist groups, the only education system is the family, school, neighborhood, university and the public. That is, "The main goal of education is the development and implementation of effective organizational and pedagogical forms and means based on rich national, spiritual and historical traditions, customs and universal values of the people in the spiritual and moral education of the youth of the new generation" [2; 6].

One of the important features of the history of our spirituality is that our spiritual growth is more focused on solving the problems of a person and his maturity. In particular, the sprouts of our independent spirituality are distinguished by the priority of the ideas of humanism and patriotism. In this sense, in the formation of the national ideology of our independent state, if we take spiritual food from the courage, patriotism and selflessness of national heroes such as Shirok, Tumaris, Spitamen, Mukanna, Amir Temur, Ulugbek, Babur, we will achieve great success.

Systematic work is being carried out to achieve the moral and educational perfection of students and young people in the essence of the comprehensive reforms that are being implemented in our country, including the fundamental improvement of the quality of teaching in higher education institutions. So to speak, it is necessary to say that the legal and regulatory documents adopted on youth policy and the large-scale reforms implemented on their basis have become the concept that determines the future of young people.

The position of tutor was abolished on September 1, 2021, when the institution of "group coach" for working with students was abolished, and instead of it, workers working with students and youth were established as tutors. The holder of this position, literally, which provides an integral connection with the teaching system; the ability of the student to demonstrate his potential during the educational process, to gain a deep understanding of himself, his identity, aspirations and worldview, to consciously control his activities, and to make correct decisions regarding the systematic management of his behavior a person who develops qualifications and skills. He helps the student to consciously understand the consequences of each activity and action, to find ways to ensure the fulfillment of his dreams in life.

I also started my career as a tutor at Shahrizabz State Pedagogical Institute on the basis of competition. In order to increase the effectiveness of educational activities in the work process, we have set ourselves the following tasks:

- ✓ establishing sincere and honest human relations with students;
- ✓ rejection of the "highest" setting in relations with students;
- ✓ believing in the inner possibilities of students and youth, open communication and encourage them in every possible way;
- ✓ the ability to try to understand students as they think and understand their inner world;
- ✓ not try to prevent student behaviour that affects their personality.

The effectiveness of the educational process in the higher education system is ensured by the cooperation of "professor-teacher-student-tutor". Azizbek Omonov's research on the need to turn tutors into important persons responsible for the education of students and youth is defined as follows: "The main form of a tutor's work is working with a student individually and in a team or acting as a pedagogical consultant for him. A number of general requirements are imposed on a tutor, such as leadership qualities, organization, initiative, purposefulness, oratory skills, communication skills, the ability to work with modern information and communication and innovative pedagogical technologies, knowledge of legal documents related to educational activities" [4].

In fact, the fact that does not require proof is that the solution of all universal problems facing humanity in the modern era is primarily associated with the activation of the role of the human factor, its sound mind, high spirituality and enlightenment. We consider it important to educate and strengthen in the minds of students a sense of pride in the historical past, present and future of their country, to educate them in the spirit of national pride, customs and traditions.
